

Standard ECMA-180

Protocol for Computer Supported Telecommunications Applications (CSTA) - Phase I

(June 1992)

This ECMA Standard has been developed by [ECMA/TC32-TG11](#).

This Standard specifies application protocol data units (APDUs) for the services described in Standard [ECMA-179](#), Services for Computer-Supported Telecommunications Applications. The field of application of this Standard is the interconnection of switches and computers in a private telecommunications environment.

Section 2 (clause 5 to clause 7 inclusive) describes the concepts underlying the Remote Operations model, notation and service. Section 3 (clause 8 to clause 16 inclusive) contains CSTA-specific protocol details and forms the main body of this Standard.

Further information on the [CSTA](#) topic is also available.

The following files are provided in this CD-ROM:

| File name | Size (Bytes) | Content |
|---------------------|---------------------|--------------------------------|
| ECMA-180.DOC | 510'464 | MS Word file |
| ECMA-180.PDF | 507'287 | Corresponding Acrobat PDF file |
| ECMA-180.PSC | 2'414'521 | Corresponding PostScript file |

Printed copies of this Standard can be ordered, free of charge, from documents@ecma.ch.
